How to play the Food Chain Game:

1. Print and cut the cards. For 2-4 players
2. Mix the animal & free choice cards together. Deal them out to the players, face up. Place the plant cards in the center of the table, face down.
3. The first player turns over a plant card. Then he chooses one of the plant-eater animal cards from his pile and places it next to the plant chosen. If the other players decide that animal would not eat that plant, he must try again.
4. If a player cannot play a card, he passes his turn.
5. The next player continues the food chain playing one of her cards.
6. Keep playing until no one can continue the food chain any longer. Each player gets a pint for each card they play. Mix up the cards and divide them up again.
7. Let another player start the next round choosing a plant to start the food chain.
8. Free choice cards can be used in place of any animal- they can choose any that will fit in the chain.
9. The player with the most points wins the game.
