

Week at a Glance: Grade 4

March 16th - 20th

Math	- Finishing up our multiplication and division unit by working on multi-step word problems and having a quiz
Language	- Explanation writing - speeches - Inferencing while reading; text/picture clues + schema = inference (what happened, what will happen next, how do they feel, what are they thinking, why did they do that...?)
Social Studies	- Labelling the map of Canada with Provinces, Territories, and Capitol Cities - Using mapping skills, longitude and latitude to find cities
Science	- Pulleys - Fixed and movable pulleys - Types of pulleys in our life - Finding effort force and mechanical advantage when using a movable pulley
Dance	Waka Waka and Celtic dancing in Music

Special Announcements:

Math Quiz:

I have been assessing students' ability to solve multi-step word problems including multiplication and division (as well as some addition and subtraction). Today we had a short quiz for multiplication and division, quite similar to the review I had given before the break.

Birthdays! Omar and Sayed = celebrating their birthdays today!

Recycled Magazines

If anyone has any old magazines lying around at home we can always use them in class.

Science Quiz

I will be giving a science quiz on Wednesday focusing only on what we have learned about pulleys. A review sheet has been handed out today.
